

Romans

By Ebonie

I think the Romans are really interesting. They were very clever and had a big influence on all the world. They conquered lots of countries and settled all around the world.

Romans had many gods. They had 12 gods and goddesses. Venus, Apollo, Dionysus, Artemis and Asclepius are a few.

Romans like watching sports. Romans also raced chariots. They also fought gladiators

They didn't understand about volcanoes and how they worked and there was Mount Vesuvius near one of one of their cities. It erupted and destroyed it.

Romans made their own necklaces to wear. They also had roman mosaics on their floor or anywhere. They were great craftsmen.
