

Cats and kittens

BY SHAKIRA LEEKS

When you get a kitten you have to keep it indoors until it is five months. Kittens like warm cozy beds to sleep in and they like sitting on people. Kittens come in all different colours and sizes.

Some cats and kittens have milk in their food and some don't. Some drink milk and some drink water. Some people buy their kittens treats. Some cats catch their own food

When cats and kittens are happy they purr.
